

## RSA Authentication Manager Migration Services

**Authentication Manager Version 8.1** offers organizations a variety of powerful features – such as improved help desk systems and enhanced software token provisioning – that can enhance your security operations. Moving from version 6x or 7x of the product to take advantage of these powerful features, however, requires proper planning and preparation. If you desire a turn-key approach to your migration, working with ComplyTec can make your migration a success.

### KEY BENEFITS OF THE MIGRATION SERVICE

The ComplyTec team excels at executing clean, seamless migrations to the new version 8.1 of Authentication Manager deployment for any sized organization currently using versions 6x or 7x of the product. Our company has performed successful migrations with both organizations managing thousands of terminals and businesses with just a few work stations. A unique combination of technological know-how and experience makes ComplyTec a leading provider of migration services. When you partner with ComplyTec you will be able to:

- Maximize your time to value with an accelerated deployment
- Review and mitigate the risks associated with implementing your authentication strategy
- Leverage RSA's established best practices while supporting your business requirements

### THE COMPLYTEC PROCESS

Our approach is to listen first and hear the objectives you are looking to accomplish with your Authentication Manager Solution. By engaging ComplyTec for an Authentication Manager migration and upgrade, you can partner with a proven team of professionals that have aided other organizations, from the Fortune 500 to the regional office, in getting a handle on their business and IT assets. Your Authentication Manager migration will flow through the following stages to ensure a successful deployment:

**Phase 1:** Authentication Manager Migration Strategy and Planning

**Phase 2:** RSA Migration Assessment Report

**Phase 3:** Migration, Testing and Deployment

**Phase 4:** Upgrades and Maintenance

Working with an RSA partner also ensures that your solution deployment will scale with your technology vision as you expand into other initiatives on your security roadmap.
