

Vendor Management

No business can tackle their industry alone; being successful means engaging with quality, well-managed organizations. But how can you provide reasonable assurance that your existing and potential business partners are built on a solid foundation? Organizations large and small struggle to manage their vendor relationships in a consistent format, often with vastly different styles between departments. To grow your organization and expand your network of partners, your organization needs a repeatable, reliable program for analyzing vendors and identifying areas of risk or concern prior to finalizing the relationship. ComplyTec has the experience to enhance your vendor program using the RSA Archer Vendor Management solution.

KEY SERVICE OFFERINGS

Vendor Process Review – ComplyTec will work with your team to ensure your approach to engaging in third-party relationships follows industry best practices and supports your business objectives.

Question Management and Design – Your vendor assessment questions are key to understanding the characteristics and qualities of the parties you will be engaging. Are you asking the right questions? Have ComplyTec review your existing assessments and help map your inventory of questions to the existing Archer question library.

Questionnaire Development and Delivery – We will partner with you to enhance your current approach to delivering assessment questions to vendors using the RSA Archer solution. Our work in previous engagements has empowered a variety of organizations to easily manage their vendor information and convert what is often a challenging, spreadsheet-based process into a easy-to-use, elegant technology solution.

Vendor Analytics – Unlocking the power of the RSA Archer solution, ComplyTec will provide your team with a clear, real-time dashboard that organizes your vendors by spend, tier and risk rating.

THE COMPLYTEC PROCESS

Our approach is to listen first and hear the objectives you are looking to accomplish with your Archer solutions. By engaging ComplyTec for a Vendor Management deployment, you can partner with a proven team of professionals that have aided other organizations, from the Fortune 500 to the regional office. ComplyTec excels in transforming what can be a tribal, convoluted approach to managing vendor relationships into a consistent, scalable and best practice approach.
